18-24 in. clumps

\$3.50 each, \$31.50 per 10, \$282.00 per 100

MALUS, THE FLOWERING CRAB

The Flowering Crabs have few rivals among gorgeous spring flowering trees and shrubs. At the Arnold Arboretum one of the important events of the year is the blooming of the Crabs, followed by the showy fruit.

They are of easy culture, and whether planted singly or in masses, give remarkable and quick results. Not only are the Flowering Crabs beautiful on the lawn, but they are used to the greatest advantage on a large scale in woodland and other mass plantings, as are Dogwoods and Hawthorns. No group of plants has greater value for enlivening open forest parks and the country roadside. The birds, too, like them.

MALUS, Crab

- arnoldiana, Arnold C. Rose and white.
- atrosanguinea, Carmine C. Brilliant carmine.
- baccata, Siberian C. Snow white.
- baccata mandshurica, Manchurian C. White.
